Mediterranean Meal Planner

PLAN · COOK · SHOP

by KaelLabs

Welcome to your Mediterranean kitchen. Plan, cook & shop *in one calm app.*

Thank you for your purchase. You'll be planning your first meal in about a minute. There's no account, no subscription and nothing to install.

On your computer

1. Unzip **Mediterranean-Meal-Planner-Digital-Download.zip**. Keep the extracted folder somewhere permanent, like Documents. Don't open the file from inside the zip.
2. Double-click **Mediterranean-Meal-Planner.html**. It opens in your web browser and works offline.
3. Bookmark it and use the **same browser** each time.

On your phone or tablet

1. Open your online link (below) in **Safari** (iPhone, iPad) or **Chrome** (Android). Or scan the code.
2. iPhone: Share → **Add to Home Screen**. Android: menu ⋮ → **Install app** or **Add to Home screen**.
3. It then opens from your Home Screen, just like an app.

YOUR ONLINE LINK

mediterranean-meal-planner-2-host.vercel.app

Open Online →

Tap the button, type the link or scan the code. What you enter is saved in your browser on that device. There is no account and no cloud sync. Each device keeps its own planner: move it with a backup file. Please keep this link to yourself.

SCAN ON PHONE

Your first five minutes

1. **Look around.** Your planner opens with a **sample week**. Click through Week Plan, Recipes and Shopping.
2. **Add your recipe.** Recipes → **New recipe**, with your own ingredients. Tap **Plan it**.
3. **Build your list.** In Week Plan tap **Build shopping list**. Your ingredients appear sorted by aisle. Anything in your **Pantry** is skipped.
4. **Repeat a good week. Copy last week** fills the new week in one tap.
5. **Make it yours.** Settings → **Clear sample data**. Anything you added yourself stays.

Sample dishes and meals are examples only, with no ingredients or method. They aren't a diet plan.

The one rule: your planner lives in your browser

Mediterranean Meal Planner saves automatically, in the browser you open it in, on that device only. So **open it from the same place, in the same browser, each time**. It doesn't sync between devices. Private or Incognito windows, clearing browser data, or moving the file can make your plans unavailable. Go to Settings → **Back up now** once a week, and use **Restore backup** to move your planner to another browser or device.

Good *to know*

Mediterranean Meal Planner by KaelLabs

What's inside

- **Home** and **Today**: your week and today's meals at a glance.
- **Week Plan** and **Calendar**: plan breakfast to dinner, copy last week, print.
- **Recipes**: ingredients, method, photos and favourites.
- **Shopping**: built from your plan, sorted by aisle, tick off as you go.
- **Pantry**: staples and use-by dates; skipped when you build a list.
- **Prep List**: soak, chop, marinate, batch-cook.
- **Balance**: your week by food group, next to a general Mediterranean pattern.
- **Goals & Water**, plus a **Journal** for meal ideas and favourites.
- **Settings**: backup and restore, CSV export, light and dark modes.

Troubleshooting

"My planner is empty!"
You probably opened it in a different browser, from a moved or copied file, or in a Private window. Open it the way you did before, or restore your latest backup.

New phone or computer?
On the old device: Settings → **Back up now**. On the new one: open the planner → Settings → **Restore backup**.

It says "Not saving".
You're in a preview window (Files app, email, zip) or private browsing. Open the file in Safari, Chrome, Edge or Firefox, or use your online link.

"Storage is full"?
Remove a few recipe photos, then back up.

Check everything works
Settings → **Run check**.

Works on

Your computer with the downloaded file (Chrome, Edge, Safari or Firefox), and your iPhone, iPad or Android with your online link. Keyboard: `/` search · `N` quick add · `Esc` close.

Print & make it yours

Week Plan → **Print** for the fridge. Shopping → **Print** for a tick-off list. Any recipe → **Print** for a recipe card. Settings has light and dark modes, 3 accent colours, week start day, water goal, and an option to hide calories.

Need a hand? Message KaelLabs through Etsy any time, with a screenshot if you can. I'm happy to help you get set up.

Private by design. No login, analytics or sync service; your plans stay in your browser. **Not medical advice.** Balance compares your plan with general Mediterranean-style eating patterns. It is not nutritional or medical advice; for personal dietary needs, speak to a qualified professional. **Licence.** Personal use only. No resale or sharing (see LICENSE.txt). **AI.** AI assistance was used for parts of the app code, text and images; food photos and illustrations were made with AI image tools. Digital product; nothing physical is shipped.

Thank you for supporting a small maker!

I built Mediterranean Meal Planner to make a week of good meals feel simple. If it helps your kitchen, **an honest review on Etsy** means a lot to a small shop and helps others find it.

Etsy → You → Purchases and orders → Leave a review
