Mediterranean
MEAL PLANNER

Welcome!
Let's get you planning.

Thank you for your purchase! Mediterranean Meal Planner is your private Mediterranean meal planner. It takes less than a minute to set up. There's no account and nothing to install.

💻 On your computer

1. Unzip the download if needed, then move **Mediterranean-Meal-Planner.html** somewhere it will stay, such as your Documents folder.
2. **Double-click it.** It opens in your web browser.
3. Bookmark the page so it's one click away.

📱 On your phone or tablet

1. Open your online link (below) in **Safari** (iPhone/iPad) or **Chrome** (Android).
2. **iPhone:** tap Share → *Add to Home Screen*. **Android:** tap ⋮ → *Install app* or *Add to Home screen*.
3. Mediterranean Meal Planner now opens like an app and works offline.

Your plans are still saved only on your own device, even when you use the link. Please don't share it. It's part of your personal licence.

✨ Your first five minutes

1. Mediterranean Meal Planner opens with a **sample week**. Click around: Week Plan, Recipes, Shopping.
2. Open a recipe and tap **Plan it**. Then tap **Build shopping list** and watch the ingredients appear, sorted by aisle.
3. When you're ready, go to Settings → **Clear sample data**, and make it yours.

🛟 The one rule: your data lives in your browser

Mediterranean Meal Planner saves automatically, privately, on this device only. So: **use the same browser each time**, don't open the file from inside a zip or email preview, and **tap "Back up now" in Settings once a week**. Mediterranean Meal Planner reminds you. A backup is a small file you can restore on any device.

Good to know

Moving to a new device

On the old device: Settings → **Back up now**. On the new one: open Mediterranean Meal Planner → Settings → **Restore backup** and pick that file.

Printing

Week Plan → **Print** gives a landscape week for the fridge. Shopping → **Print** gives a tick-off list. Any recipe → **Print** gives a recipe card.

Make it yours

Settings has dark mode, 3 accent colours, week start day, water goal, and an option to hide calories entirely.

Troubleshooting

"My planner is empty!"
You may have opened it in a different browser, or moved the file to a new folder. Open it the way you did before, or restore your latest backup.

A yellow "can't save" warning appears.
You're in a preview window (Files app, email, zip) or private browsing. Open the file in Safari/Chrome/Edge/Firefox, or use your online link.

"Storage full."
Remove a few recipe photos, then back up. Photos are shrunk automatically, so this is rare.

Check everything works:
Settings → Help → **Run check**.

Works with

Designed for current Chrome, Edge, Firefox and Safari on Mac, Windows, ChromeOS, iPhone, iPad and Android. Keyboard shortcuts: **/** search · **N** quick add · **Esc** close.

💛 A small favour, from a small shop

Thank you for choosing a small, independent shop. If this planner has made your week a little calmer, we would be so grateful for a few kind words. Please feel free to **leave a comment and review on Etsy**: what you like, what helped most, and what you would love to see next. Your recommendations help other home cooks find us and help us improve. If something didn't work, message us first and we will happily make it right. With thanks, KaelLabs 🫒
