Plan meals. Simplify shopping.

Runs in your web browser, online or offline. No account, no subscription, nothing to install. Setup takes about a minute.

On your laptop or desktop

1. Unzip **Mediterranean-Meal-Planner-Digital-Download.zip**. Move **Mediterranean-Meal-Planner.html** to a folder where it will stay, such as Documents.
2. **Double-click it.** It opens in your browser and works offline.
3. Bookmark it. Use the same browser each time.

On your phone or tablet

1. Phone file managers often show only a preview. Use your private link below instead.
2. Open it in your phone's browser.
3. iPhone: Share → Add to Home Screen. Android: ⋮ → Install app or Add to Home screen.

YOUR PRIVATE ONLINE LINK

mediterranean-meal-planner-2-host.vercel.app

Open →

Scan the code with your phone camera. Everything you enter saves only in the browser and device you use.

Your first five minutes

1. **Look around:** the planner opens with a sample week. Click through Week Plan, Recipes and Shopping.
2. **Plan a recipe:** open a recipe and tap Plan it.
3. **Build the list:** tap Build shopping list and watch the ingredients appear, sorted by aisle.
4. **Make it yours:** go to Settings → Clear sample data, then add your own meals and recipes.

The one rule: your data lives in your browser

Mediterranean Meal Planner saves automatically on this device only. **Use the same browser and file location each time.** The online and downloaded copies do not sync. Open **Settings** and use **Back up now** regularly. Private browsing or clearing browser data can erase your plans, so back up first.

Keep it safe, keep it simple.

Backup and moving devices

Settings → Back up now saves a file. Keep it outside the browser, in a safe folder. On a new device: Settings → Restore backup and pick that file.

What is in your download

Mediterranean-Meal-Planner.html, this guide and LICENSE.txt.

Printing and making it yours

Week Plan → Print gives a landscape week for the fridge. Shopping → Print gives a tick-off list. Any recipe → Print gives a recipe card. Settings has dark mode, 3 accent colours, week start day, water goal and an option to hide calories.

Troubleshooting

“My planner is empty!”
You may have opened it in a different browser or moved the file. Open it the way you did before, or restore your latest backup.

A yellow “can’t save” warning.
You are in a preview window or private browsing. Open the file in a normal browser window, or use your online link.

“Storage full.”
Remove a few recipe photos, then back up. Check everything works: Settings → Help → Run check.
